Encouraging drilling results have been obtained from the initial program completed at the Greenvale project in Queensland. Also, the air core drilling programs at the Barlee Gold project have returned very encouraging results and provided a number of priority targets for the next deeper reverse circulation drilling program.

The company incurred a net loss after tax of \$ 177,524 during the half year to 31 December 2007.

The principal activities of the company continue to be mineral exploration. The directors have focused the company's operation on the Greenvale copper, gold, molybdenum and silver project in north Queensland and the Barlee Gold project north of Southern Cross in Western Australia.

Accordingly, we do not express an audit opinion.
